The greens of Mamer

The dei gréng Mamer team wishes you a great summer

DÉI GRÉNG MAMER DELIVER A CHECK TO THE CHARITY CARE LUXEMBOURG.

At the general assembly of the Gréng Mamer a check of 500 € was delivered to the charity CARE Luxembourg. These are the receipts of the Chrëschtmaart 2021.

CARE was founded in 1945 in the USA in order to provide millions of Europeans with the legendary CARE package, containing food and products for daily use.

As of today, CARE is present in more than 100 countries and is committed to the fight against poverty for the benefit of those affected by disasters. CARE dedicates itself to the advancement of women and girls, particularly in regions where they suffer systematic disadvantages.

A SUSTAINABLE"COURSE CORRECTION IN THE DOMAIN OF CLIMATE AND ENVIRONMENT PROTECTION

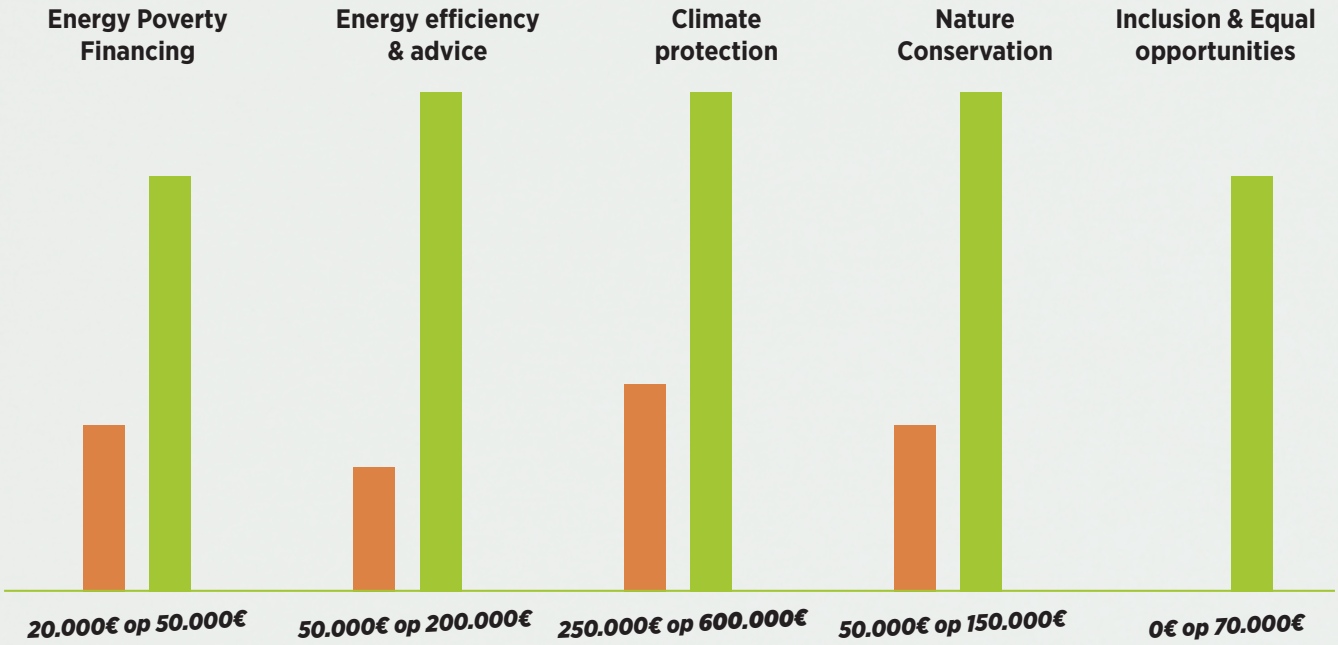
FASTER, PLEASE!

Déi gréng Mamer will support all investments that will contribute to the fight against climate change and the loss of biodiversity, which are as of now being implemented by the majority:

- photovoltaics on all municipal buildings;
- the new environmentally friendly cogeneration plant ;
- adjacency to the Veloh'ok Network;
- a community garden.

BUT it is lacking a coherent strategy as well as concrete concepts!

At the time of the voting of the budget for 2022, dei Gréng demanded an additional 780 000 Euro in form of additional credits, this demand has been unanimously accepted.



What is the climate pact?

The gouvernment supports municipalities based on a catalog of measures in different domains, collectively aimed at realizing ambitious targets on a local level.

By means of the setting up of a climate team, people, together with a climate adviser, have the possibility to assess current iniatives and to set concrete targets.

CLIMATE PACT 2.0

WHAT IS THE CURRENT STATUS?

The council has signed the Climate Pact 2.0 on July 5, 2021. Until then, however, we have not looked for a balance sheet that would allow us to define priorities for climate protection, and that's after almost one entire year.

déi gréng Mamer demand:

- **a climate and environment adviser that is working solely in this domain ;**
- **a participative and inclusive approach to the implementation of the set goals:**
- **a better counseling for the refurbishment of old buildings and more financial support for energetically friendly renovations.**

NATURE PACT

WHAT IS THE CURRENT STATUS?

The Convention of the Nature Pact has been approved by the municipal council in November 2021, in May 2022 the Nature Conservation Syndicate SICONA has been confirmed as the Nature Pact's advisor.

The Nature Pact functions like the Climate Pact, through a catalog of measures that are to be implemented. Likewise to the Climate pact, the government supports here with subsidies for the implementation as well as a cost-sharing for the nature pact advisors.

déi gréng Mamer demand:

- **a consistent protection of the biotopes in our municipality;**
- **extensive maintenance of public green spaces and less soil sealing;**
- **a targeted replanting in existing residential areas;**
- **a participative approach, for example through tree sponsorships.**

Up until now, no nature pact team has been formed, and nothing has been discussed with the commission on Energy and environment. Why is that?

What is the Nature pact?

Through the nature pact, the municipalites are being rewarded for their conservation efforts of the biodiversity and natural ressources, this because today 80% of the world's animal and plant species are in a precarious state.

HOUSING PACT 2.0

WHAT IS THE CURRENT STATUS?

OUR MOTION

Our goal is to create affordable living spaces in our municipality! A rich municipality must take on this responsibility and not just delegate it towards public investors like the national housing for affordable housing (such as the SNHBM and the Fonds de logement).

Right now, the percentage of social housing in Luxembourg is 1.56% in Luxembourg, this needs to go up substantially.

déi gréng Mamer demand:

- **no further expansion of the PAG, much rather a filling up of existing gaps between buildings ;**
- **denser construction in areas that are easily included into the network of public transport;**
- **an increase of the offer of properties up for rent, in order to meet the needs of, in particular: students that are single parents and people with limited mobility.**

At the unanimous vote in June 2021, we came to a consensus in the municipal council, we now look towards the majority to deliver results, and get active!

Adèle Schaaf-Haas
Municipal Councillor | Member of the national executive committee of the party
Conseillère communale | Membre du comité exécutif national du parti

Claudine Vervier
Municipal Councillor
Conseillère communale

Mim Bernard
Municipal Councillor
Conseillère communale

Djuna Bernard
President of the Green Party
Vice President of the Parliament
Présidente du parti déi gréng
Vice-présidente de la Chambre des députés

DÉI GRÉNG MAMER : CONECTED, COMMITTED, THERE FOR YOU!

As the largest opposition party, Déi Gréng Mamer have consistently been engaged to give constructive inputs to further development. Alongside our many , clubs and initiatives, we also represent the party on regional and national levels.

We are proud to say that the President of Déi Gréng, and vice-president of the Chamber, Djuna Bernard has been engaged in our local branch from a young age onward. Adèle Schaaf-Haas, a member of the municipal council, has been a member of Executive Committee of the party for a year now. As a group, we are thus part of interesting exchange with our ministers and member of Parliament, this is further enabled through collaboration of the neighbouring local branches of Bertrange and Strassen.

At the beginning of May, we joined friends from the south district of Déi Gréng and exchange our vivid vision for the region. The rich cultural heritage of our region was acknowledged, as well as our all-encompassing sustainable perspectives and our hopes to see more green villages and towns.
